

RPT5032J

The RPT5032J uses Rakon's new patented, Pluto+ ASIC. Pluto+ advances on the world famous, 'best-in-class' Pluto ASIC technology by providing enhanced frequency versus temperature stability. It also delivers to the industry the lowest jitter achievable from an ultra-stable TCXO. This allows the oscillator to be compliant with various standards including GR-1244, GR-253, G.812, G.813, G.8262 and G.827x.

Features

- Best in class frequency versus temperature
- RMS phase jitter down to 0.13ps
- Phase noise < -160dBc/Hz floor
- Excellent holdover stability

Applications

- Stratum 3 / IEEE 1588 / SyncE
- SONET / SDH / WDM / OTN
- Carrier Ethernet / Microwave
- Backhaul / Transport Equipment

5.0 x 3.2 mm
