

## RXG1490L

Rakon's RXG1490L GHz XO enables output frequencies of up to 2.2 GHz with ultra-low RMS phase jitter (as low as 15 fs typ, 12 kHz to 20 MHz). RXG1490L is an ideal solution for Optical Coherent Networking, and high speed ADC/DAC/SERDES clocking, where excellent oscillator phase noise and jitter is critical to system performance. This product is also available as a VCXO, Rakon RVG1490L.
